★ 4. Project: NYC Subway Data Analysis

## Evaluation

A Udacity Reviewer will review and check if you completed all exercises in the ipynb file, as well as the pdf file answers.

Be sure to complete all questions in the Problem Sets and the Project Document before submitting your Project.

## Rubric

Your Project will be evaluated by a Udacity Reviewer according to this [Project Rubric](#). Be sure to review it thoroughly before submitting. Your Project "meets specifications" if it meets specifications according to all criteria.

## Submission

Ready to submit your Project? Submit the following files:

1. The [ipynb file](#) with all exercises completed.
2. The html file that was exported from the ipynb.
3. The list of websites, books, forums, blogs, GitHub repositories, etc that you referred to or used in this presentation. (Add N/A if you did not use these resources.)

Then return to your Udacity Homepage, click the Project, and follow the instructions to submit:

- If you want to upload your files through a “Link to Project”, upload your Project Files to GitHub and send us the link.
- If you don’t want to upload your files through “Upload a Zip”, compress the Project Directory, and submit that zip file.

Review can take up to 7 days, but most projects are reviewed within 24 hours.

If you are having trouble submitting your Project or wish to check the status of your submission, please email us at [dataanalyst-project@udacity.com](mailto:dataanalyst-project@udacity.com).
